Objective

I'm a Software Developer and excited to find my next role at a company where I can build great products and continue to master the craft. A long time ago, in a galaxy far far away... I organized multiple aspects of large scale live concerts, tours, and events - specializing in audio engineering. I've decided it's time to take all those skills and experience and make a career change, in hopes of spending more quality time with my family. While the work was fulfilling, the lifestyle wasn't.
